## 2022-2024 Ocean Lake Grant Funding

### Program Objectives

The Lower Wind River Conservation District received a grant from the Wyoming Department of Agriculture. The purpose for the grant is to help reduce the sediment flowing into Ocean Lake. So, we are funding projects that will reduce the flowing of sediments into Ocean Lake.

### Project Examples (Includes but not limited to)

- Bank Stability
- Bank Sloping
- Vegetation
- Water Gaps
- Fencing

### Funding Level

The Lower Wind River Conservation District will pay for the materials to complete the project. However, the recipient of the funding is in charge of paying for the installation of the material. i.e. the recipient will either install it themselves or pay someone to install it for them.

### Selection Process

Application packets are available online on our website or in our office. Applications will be accepted at any time but for this grant, applications won't be accepted after **March 1, 2024**. However, the sooner the application is submitted the better as *the funding will be awarded on a first come first served basis*. Once the application is submitted it will have to be approved by the board before funds are awarded. Funded recipients will have until April 30, 2024 to complete their projects.
